

## **Environmental Policy**

### ***INTRODUCTION***

DanMedical Limited is an electronic assembly, production and service workshop with offices. There is no manufacturing facility at the DanMedical works that risks possible damage to the environment because our processes are minimal. However, we accept that all efforts need to be made to ensure that our actions do not result in any harm to the local environment.

It is our responsibility to minimise any effect on the environment from our actions and every effort to re-cycle waste will be made.

### ***REPORTING***

The staff are to report to the Managing Director any instances where there may be an environmental issue.
